OmniLyse® Protocol
For OmniLyse (standard version) and OmniLyse HL (high-load version)
(For research purposes only)

OmniLyse® devices are intended for research purposes only. Carefully read instructions prior to use. For any questions regarding use of the product please contact Claremont Bio at 1-855-855-1777.

OmniLyse® Steps

1. Attach a syringe to OmniLyse® cartridge and attach the cartridge to the Bat-Pac™ battery pack via the blue mating connectors, lining up the red marks.

2. Re-suspend cell pellet (up to 1x10⁸ bacterial cells) in 500 – 1000 µl of your preferred buffer (not compatible with Phenol/chloroform or TRIzol reagents). Mix by vortex or by pipetting to resuspend the pellet.

3. Insert the OmniLyse® tubing tip into the sample. Draw sample into OmniLyse® cartridge with attached syringe, displacing the air.

4. Turn on the battery pack and slowly draw the majority of the remaining sample through the cartridge such that cartridge remains filled with sample. Battery pack does not need to be held during sample processing and can be placed on a surface.

5. Reverse direction, dispensing the majority of the sample through the cartridge into the sample tube. Continue withdrawing and infusing the sample for 30 seconds to 5 minutes, depending upon ease of lysis and desired lysis efficiency.

6. Turn off battery pack, and collect lysed sample in microfuge tube. Discard OmniLyse® cartridge and syringe appropriately.

OmniLyse® HL (high-load version)
(Suggested max. load: up to 1x10¹⁴ cells)

1. Attach a syringe to OmniLyse® HL cartridge. Attach a tubing tip to luer fitting on sample port.

2. Attach the cartridge to the Bat-Pac™ battery pack via the blue mating connectors, lining up the red marks.

3. Re-suspend cell pellet (up to 1x10¹⁴ bacterial cells) in 500 – 1000 µl of your preferred buffer (not compatible with Phenol/chloroform or TRIzol reagents). Mix by vortex or by pipetting to resuspend the pellet.
4. Insert the tubing tip attached to OmniLyse into the sample. Draw sample into OmniLyse® cartridge with attached syringe, displacing the air.

5. Turn on the battery pack and slowly draw the majority of the remaining sample through the cartridge such that cartridge remains filled with sample.

6. Reverse direction, dispensing the majority of the sample through the cartridge into the sample tube. Continue withdrawing and infusing the sample for 30 seconds to 5 minutes, depending upon ease of lysis and desired lysis efficiency.

7. Turn off battery pack, and collect lysed sample in microfuge tube. Discard OmniLyse® cartridge and syringe appropriately.

**OmniLyse® devices can be held using either one or two hands**

**Limited Use Label License: Claremont BioSolutions LLC**

FOR RESEARCH PURPOSES ONLY. The provider of this product conveys to the buyer the non-transferable right to use the purchased amount of the product and components of the product in research conducted by the buyer (whether the buyer is an academic or for-profit entity). The buyer cannot sell or otherwise transfer (a) this product (b) its components or (c) materials made using this product or its components to a third party or otherwise use this product or its components or materials made using this product or its components for Commercial Purposes. The buyer may transfer information or materials made through the use of this product to a scientific collaborator, provided that such transfer is not for any Commercial Purpose, and that such collaborator agrees in writing (a) not to transfer such materials to any third party, and (b) to use such transferred materials and/or information solely for research and not for Commercial Purposes. Commercial Purposes means any activity by a party for consideration and may include, but is not limited to: (1) use of the product or its components in manufacturing; (2) use of the product or its components to provide a service, information, or data; (3) use of the product or its components for therapeutic, diagnostic or prophylactic purposes; or (4) resale of the product or its components, whether or not such product or its components are resold for use in research. For products that are subject to multiple limited use label licenses, the terms of the most restrictive limited use label license shall control. Claremont BioSolutions LLC will not assert a claim against the buyer of infringement of intellectual property owned or controlled by Claremont BioSolutions LLC which cover this product based upon the manufacture, use or sale of a therapeutic, clinical diagnostic, vaccine or prophylactic product developed in research by the buyer in which this product or its components was employed, provided that neither this product nor any of its components was used in the manufacture of such product. If the purchaser is not willing to accept the limitations of this limited use statement, Claremont BioSolutions LLC is willing to accept return of the product with a full refund. For information about purchasing a license to use this product or the technology embedded in it for any use other than for research use please contact Claremont BioSolutions LLC, 1182 Monte Vista #11, Upland, California 91786, 909-920-3887.
